## Family Row Aired In Court All Ready for the School Fair

John Olorenshaw Goes To Jail For Assaulting His Father

Troubles of the Olorenshaw family of Airdrie were aired before Magistrate Gordon on Friday last, when Tom Olorenshaw, the father, laid charges of assault against one son, John K., and a charge of sending menacing letters against another son, Eric H.

John K. Olorenshaw was found guilty of assaulting his father and occasioning his actual bodily harm. He was sentenced to 60 days at hard labor in Lethbridge jail, and fined \$10 and costs with the option of another 30 days in jail.

Eric H. Olorenshaw was dismissed on the letters of menace charge when it was found that insufficient evidence had been produced. The letter referred to reads as follows:

"I have received authority from Mr. Oage Hanson to put this notice on his building concerning the removal of any furniture belonging to Mr. and Mrs. T. Olorenshaw, on which I have paid the sum of \$36 to settle an account which I wish to redeem. Anyone partaking in said removal will be responsible for said money, or will be prosecuted otherwise than through the court."

The court found that such a notice did not constitute a menacing letter, as it had been posted on Hanson's building.

## School Opens Tuesday

High and Public Schools Re-Open Next Week After Summer Vacation

On Tuesday morning the Crossfield schools re-open after the summer holidays. The staff will be: Mr. J. L. Johnston, principal; Mrs. J. A. Emery, Miss Alice Collicutt and Miss Edith Seville.

## Cochrane Tennis Players Entertained

A number of tennis players from Cochrane were guests of the Crossfield Tennis Club on Sunday for friendly matches at the local courts. The day was fine for tennis and the courts were in good condition. Men's singles and doubles, ladies' singles and doubles and mixed doubles were played, and while the home players had the advantage on the day's play there was some enjoyable tennis on both sides.

The following represented the Crossfield Club—Mr. and Mrs. T. M. Goldie, Mr. and Mrs. A. Stevens, Mrs. W. Spivey, Miss Isabel Goldie, C. H. McMillan, Ivor Lewis, Max Grant, Gavin Goldie, Merle Heywood.

Through the kindness of Mrs. F. Mossop, the players were hospitably entertained at her home where refreshments were served to round out a very pleasant afternoon.

## 25 YEARS AGO

(Crossfield Chronicle, August 27, 1908)

Mr. Laut finished cutting wheat last Friday.

Dr. Lackner of Didsbury was in town on Thursday.

Frank Williams is building a new house in town which will be occupied by Chas. McLean.

F. R. Parker and L. Powers were out east on Friday and sold a bunch of cattle to D. McDaniels.

Motter Bros. have arrived from Calgary to superintend their harvesting operations east of town.

Mr. Becker is busily engaged fixing up the house he recently purchased and F. McLean is to move into it when completed.

Mrs. W. Pines presented the editor with a fine sample of home grown roses.

Mr. and Mrs. S. Sage Nicholas left a fine sample of vegetables at the Chronicle office.

Mrs. Geo. Hatt of Airdrie passed away this week.

J. H. McCool has commenced work on his new residence in town. P. G. Cowling was in town on Thursday.

Bank of Commerce crop report shows wheat and barley cutting general. Two slight frosts but no damage reported to grain. Hail damage only 5 per cent.

School Fair day will soon be here and everybody should co-operate to make the Fair a success and give the boys and girls a day of experiences not soon to be forgotten as a little encouragement for the next one.

A nice program of sports has been arranged, including a relay race comprising four pupils from each school.

It is important that parents and the boys and girls bear in mind that the exhibits MUST be the handiwork of the exhibitors themselves. It is strictly against the rules for boys and girls to exhibit anything in the preparation of which they have had more than the advisory assistance of their parents or others.

The fullest benefit can only accrue to the pupil when the exhibit is the result of his or her own effort.

Teachers and School Boards are asked to consult with the Committee in order that adequate facilities may be provided for getting the children and their exhibits to the Fair in good time. Where it is impossible to get transportation in any other way, we will send out a car or truck, providing we know not later than noon on Wednesday, Sept. 6.

All exhibits must be in by 10 a. m. and each article properly tagged.

The members of the Calf Club will also show their animals at the same time, and a judging lesson will also be held to determine who shall go to Edmonton to represent this Club at the provincial contest.

The program for the day will be: 10:00 a.m. All work and animals to be in place.

10:30 Judging of everything but livestock.

10:30 Sports.

12:00 Lunch.

1:00 Judging Livestock.

2:00 Boys and Girls Calf Club Judging.

3:00 Auction Sale of Mr. Collicutt's calf and fat calves.

3:30 Doors of building open.

5:00 Exhibits may be moved—NOT BEFORE.

Phone R1403 for any information.

## Auction Sale

At the School Fair on Thursday, September 7th, there will be sold by auction a pure bred Hereford heifer calf, W. S. Gay Lass 1025, kindly donated to the Calf Club by Mr. Frank Collicutt.

This will be a rare opportunity for local breeders to secure a high-class well bred animal.

## Crossfield 10; Madden 7

The Crossfield baseball team defeated Madden by a score of 10 to 7 on the grounds of the latter on Sunday afternoon. Shut out relief pitching by Frank Mair was the feature of the game. The big boy held the Madden squad to one lone hit and no runs during the five innings he toiled.

"Swede" Johnson connected for a timely three bagger. Crossfield came through with a fast double play in the ninth with two on to check a threatened rally.

Crossfield—Miller, Mair and Faas. Madden—Wilson, Banta and Walsh. CROSSFIELD—Gordon Johnson, 3b; L. Pullen, ss; Otto Faas c; Frank Mair, 2b and p; Bill Terry, rf; Stanley Pogue, lf; Ralph McFadyen, cf; Stanley Miller, p; and 3b; Austin Askew, 1b.

## Crossfield Girls Win at Dog Pound

The Crossfield girls softball team continued their winning ways on Friday last when they journeyed to Dog Pound and defeated the girls of that place by a score of 12 to 6 in a very interesting game.

Lake Parsons umpired the game and gave entire satisfaction.

Crossfield—Mary Murdoch, p; Margaret Fitzpatrick, c; Veva Green, 1b; Gertrude Sharp, 2b; Grace Williams, ss; Mildred Methers, 3b; Isabel Goldie, Florence Cruickshank and Helen Sharp, fielders.

Get your Stationery at the Chronicle office.

# First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam all the way. The historic voyage was made by a Canadian-built, wooden paddle-steamer, the "Royal William."

To commemorate this notable event the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April, 1831, and towed to Montreal to be fitted with engines developing 200 horse-power. Her cost when ready for sea was \$75,000. Her dimensions were: length over all 176 feet; depth of hold 18 feet; breadth over paddleboxes, 44 feet. She was originally intended to ply between Montreal and Quebec and Nova Scotia, and the enterprise of building her was carried out by a group of Quebec and Halifax merchants, assisted by a grant of \$15,000 from the Government of Lower Canada. Among the shareholders appear the names of three Cunard brothers, one of whom later founded the present Cunard Line.

After three moderately successful voyages in 1831 to Halifax and intermediate ports she laid up for the winter. In 1832, owing to a cholera epidemic, she made only one voyage, and her owners became bankrupt.

In the spring of 1833 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then in June, 1833, on her way to Boston, where she was enthusiastically received as being the first steamship flying the Union Jack to enter a United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, demonstrating to the world the feasibility of navigating the oceans by means of steam-propelled vessels, notwithstanding the declaration of critics that "they might as well talk of making a voyage from Quebec to the moon."

Early in August, 1833, she left Quebec for Pictou, in the Northumberland Strait, where she remained a few days coaling, storing, repairing engines, and awaiting passengers. Eventually, on August 17th, she steamed out of Pictou Harbour for England. Her clearance papers stated she was a vessel of 363 tons bound for London, that among the goods carried were 254 chests of coal (648 tons), a consignment of ship's apparel, a box of stuffed birds, one harp, one box, one trunk, household furniture and seven passengers, all British. Her master was John McDougall. During the voyage the starboard engine was disabled and the vessel sprang a leak. After 25 eventful days and nights the "Royal William" arrived at Gravesend. Ten days later the vessel was sold for \$50,000 and chartered to the British Government as a troopship. Captain McDougall retained command and took her out to Lisbon, where she was successfully offered for sale to the Portuguese.

In 1834 the ship was bought by the Spaniards, sent to Gravesend to be converted into a "war-steamer," and renamed the "Yasael Segunda." Later she returned to the Spanish coast, and on May 5, 1836, in the Bay of San Sebastian, she earned the distinction of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repair but was converted into a hulk. Her engines were transferred to a new ship of the same name, which ultimately sank off the Algerian coast during a violent storm in 1860.

And so, with her hull rotting in Bordeaux harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

## The Friendly Border

Pat Campbell made the 500-mile trip from The Pas to Winnipeg with his dog outfit on the way to Chicago Fair and on reaching the border found that he would have to put up \$200 and \$2 for each dog entering the land of the free. Once again, says the Stratford Beacon-Herald, that is the same friendly international border about which orators speak at banquets.

France is testing out a new type of vest pocket warship.

W. N. U. 2093

## Famous "Bull-Dog Ants"

Professor States Primitive Australian Insects Are Vicious Creatures

The only formidable "animals" in the Australian bush are poisonous snakes and the famous "bull dog ants," according to Dr. William Morton Wheeler, professor of entomology at Harvard University.

The "ponerines" or primitive ants of Australia sometimes reach more than an inch in length, are "singularly alert, wasp-like, large-eyed, long-jawed and fiercely stinging creatures. The larger species live in mound nests which may be from 1 to 5 feet in diameter and the population of a colony is from 150 to 200 individuals," said Dr. Wheeler.

## Russians Cannot Own Dogs

Must Be Killed For Skins To Clothe Soviet Army

In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to special dog pounds. The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the army's requirements.

By Ruth Rogers

MODISH AND SLENDERIZING LINES HAS THIS LOVELY DAYTIME DRESS

Here's a charming model for the heavier figure. The partial belt treatment creates a long-lined line. The skirt while slender, indicates an easy flare at the hemline.

It is simple, smart and becoming in brown and white crinkly crepe silk against a bib-like yoke of white crepe. It's a dress that will carry you through an entire day. It will cost you but a small sum to make it, and will take very little of your time.

Plain grey, beige or black with white is delightfully lovely.

Style No. 643 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 50-inch material with 1/4 yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cut carefully.

## One Of London's Mysteries

No One Knows Why City's Smallest House Was Built

London's smallest house is now for sale. Wedged in between two tall mansions in Hyde Park Place, it is only six feet wide and just twenty feet long. It consists of a tiny entrance hall and one room on the ground floor and two more rooms above. Joining them is a narrow iron ladder which a fat man could not possibly ascend.

Still it is a real house with a number and a letter box, but no knocker or bell. No one has lived in it for some time, though it has occasionally been used as a servant's bed room by the owners of the house next door.

How such a tiny place came to be built is one of London's little mysteries. It is said that about 60 years ago a certain Miss Fubb, who lived next door, had it built for her maid when she retired. It is further alleged that miniature furniture was made to fit it. It is thought that Barrie had the little house in mind when he described the home of Mr. and Mrs. Darling in "Little White Bird."—London Correspondent.

## New Industry In Canada

Montreal Factory Producing Nicotine Sulphate In Commercial Quantity

Nicotin sulphate is now being produced in Montreal in commercial quantity, according to the Markets Division of the Dominion Seed Branch. The plant is designed to manufacture in sufficient volume to meet Canadian requirements and supply some export business as well. Free nicotine is another product of the same plant. All the tobacco as well as the chemicals used in this new industry are of Canadian origin. The low grade and waste tobacco from the Ontario and Quebec crop serves as the raw material. The nicotine sulphate manufactured therefrom is of standard 40 per cent. strength in appearance and volatility is equal or superior to the best imported from other countries.

## More Farms In Canada

Increase Has Been Only In Four Western Provinces

During the last two decades there has been an increase of 46,325 farms in Canada. In the five eastern provinces there was a total decrease of 51,703 farms, while there was an increase of 97,997 farms in the four western provinces. A gradual shifting from land ownership toward tenancy is taking place in all provinces except in Quebec where there is a slight increase in land ownership. The shifting to tenancy is particularly noticeable in western provinces.

## Standard Bushel

Unless a bushel by measure is specially agreed upon, it must weigh the following number of Standard Canadian pounds: Clover seed, beans, wheat and peas, 49; Indian corn and rye, 56; barley, buckwheat, timothy seed, 45; hempseed, 44; castor beans, 40; malt, 36; oats, 34, and blue grass 14 pounds.

Of course Canada has a future. They're selling 1934 calendars now.

## Canada's Fruit Crop

Apples Will Be Plentiful But Other Fruits Scarce

The Dominion Department of Agriculture estimates the 1933 crops of pears, peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,436,000 barrels on the Canadian apple crop, compared with 3,977,000 barrels last year.

Canada's pear crop this year was estimated at 434,000 bushels, compared with 466,000 bushels last year. The peach crop was placed at 813,000 bushels, a drop of 91,000 bushels from 1932. The plum crop was estimated at 22,000 bushels, only 70 per cent. of last year's total. Due to failure in Ontario, the commercial grape crop was estimated at 44,568,000 pounds, compared with 54,100,000 pounds last year.

## Trade Within Empire

Canada's Trade Shows Increasing Exports To Empire Countries

All British Empire countries, but the British West Indies, imported more goods from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada rose from \$2,068,263 to \$3,163,654 or 53.9 per cent., while those of the United Kingdom increased 34.8 per cent. from \$46,907,811 to \$63,222,280. Imports of Canadian goods into British India rose 25.9 per cent. to \$89,116 and to South Africa 16.6 per cent. to \$1,526,152. New Zealand's imports were up by 9.2 per cent. to \$1,005,533 and those of Newfoundland 1.1 per cent. to \$1,829,864.

## Cougars Menace Ranchers

Residents Of West Coast Of Vancouver Island Lose Livestock

Residents of Port Alice, on the west coast of Vancouver Island, walk the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the town.

Having exterminated the deer and fur-bearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and heifers, practically all the dogs have fallen prey to them.

This information was brought by Rev. William Gravel, of Port Alice. "Unless drastic action is taken soon the loss of the ranchers will be forced to abandon their ranches," Mr. Gravel said.

## Idea Did Not Work

Following complaints of smaller merchants that department stores in Tokyo were injuring their business, the big stores in Tokyo were ordered to close three days every month. Now the smaller merchants report that on those days shoppers stay at home and the sales of stores remaining open have decreased.

Prices of agricultural products in Chile are increasing.

## EXPLORER'S WIFE PREFERS HOME

Expeditions to the north and south poles are thrilling, but Lady Hubert Wilkins, wife of the famous Australian explorer, prefers the less adventurous joys of domestic life. She is now in New York while her husband is with the Ellsworth Antarctic Expedition. Lady Wilkins plans to accompany her husband on one more polar trip and then settle down to real home life.

# Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

## Unridden To The Last

Backing Horse Retires From Rodeos Still Unconquered

"Midnight," wisest of western stamper horses, has made his last appearance before a rodeo audience, taking the final curtain call in a cloud of dust at the Cheyenne round-up the other day. He will be retired to the groom pastures.

"Midnight," perhaps the greatest bucking horse ever known to the rodeo world, plunged out of the Cheyenne arena chute, and reaching for the sky with his front feet, head down and his feet poised ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1933 Cheyenne round-up champion rider flying. Greenough stuck to "Midnight's" sleek, black back only two seconds and his feet poised ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1933 Cheyenne round-up champion rider flying.

Mighty "Midnight" was once a docile, sturdy cow pony of the Alberta foothills. One day a tumbleweed blew under his belly and sent him on his first bucking spree and on to fame. For a decade he has furnished thrills to rodeo crowds from Calgary to Tucson and now at seventeen years of age he will be taken away forever from the arena by his owners, Verne Elliott and Eddie McCarthy. They are retiring him to their ranch in the foothills.

The celebrated bucking brand easily outstrips the meanest rodeo mount. He is more powerful, bigger, faster. He has the weight of a truck horse and the speed of a mustang. He goes mad when released from a chute but otherwise is kind and docile. "Born to buck—that animal," said an old-time cowboy recently. And that about sums it up.

## Lives High Above World

Home Of Forest Reserve Guardian 8,130 Feet Above Sea Level

Perched on a narrow patch of crumbled rock, 8,130 feet above sea level, where he lives all summer as one of the provincial government's Bow River forest reserve guardians, Arthur Shantz told a reporter that "it'd be all right if I could keep the place warm and the government would give me enough paint to cover the cabin."

Those were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 30 feet wide by 50 feet long.

The lumber for the shack occupied by Shantz, who likes to call himself the "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

## Relic Of Bronze Age

Interesting Discovery Made Near Oxford, England

Burials which took place 4,000 years ago are being unearthed near the village of Cassington, a few miles from Oxford, where a by-pass road is being constructed to divert traffic from the university city.

Seven skeletons, in the "crouched" position, which denotes that their burial took place in the bronze age, have already come to light. A notable feature in each case was that the bodies had been buried facing the setting sun.

## Saskatchewan Butter Output

Production Of Creamery Butter For July Sets New Record

Saskatchewan's output of creamery butter during July has set a new high record, it was announced.

Total output for the month totalled 3,261,986 pounds. This represents an increase of 712,783 pounds or 28.1 per cent. over the corresponding figures for the same month of 1932. Although the increase is most marked in the northeastern part of the province, the increase is quite general over the entire province.

## Put To Some Use

In a curio exhibition held in connection with a village flower show at Knoddisall, Suffolk, the other day, the second prize was awarded for a walking-stick made from the paper of 3,000 love letters.

The beauty of the house is order; the blessing of the house is contentment; the glory of the house is hospitality; the crown of the house is godliness.

Discussion of the wheat situation and its effect upon international relations marked a round-table conference of the Institute of Pacific Relations.

A Canadian delegate opened the discussion with an authoritative account of developments in Canadian wheat since 1927, the emergence of a serious glut, measures taken to cope with it, impact of foreign tariff upon Canada's export trade, and negotiations at Rome and elsewhere for coping with the situation.

Under present conditions the member said, the view is impracticable that the wheat growing industry of Western Canada may be described as bankrupt, and its plight is being aggravated by the chaotic condition of wheat acreage. He thought, however, there is considerable hope of advantage of the wheat grower in some international arrangement between the major wheat exporting countries whereby they would agree to establish between themselves a quota system for exports and to control deliveries. He believes such a scheme was feasible, and would not only help to raise the price level, but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

If an export quota system were introduced it would be necessary to establish a wheat board which would keep export marketing within a single channel.

It was agreed if the process of industrialization continues in Japan she will be bound to seek food supplies in the cheapest market and will probably increase her import of wheat.

A delegate from the Dutch East Indies declared the tendency of Java to import wheat is increasing. Expansion of the wheat market available in China is problematical, it was indicated, as many Chinese do not consider wheat flour a superior article of food and also an increase of local wheat production.

## U.S. Citizen Appointed

Hon. Newton Baker Selected Chairman Of Pacific Relations Council

Hon. Newton D. Baker, secretary of war in the Wilson administration of United States, has been appointed chairman of the Council of the Institute of Pacific Relations, succeeding Jerome D. Greene, Wilson professor at the University College of Wales.

Acknowledging the honor which had been conferred on him, Mr. Baker told a general meeting of conference members most of the troubles in the world came from misunderstanding and, therefore, the institute had a high duty in search of and spreading knowledge in order to lay a basis for understanding through approaching in a hopeful and scientific way the great international problem which had come to be the world's chief preoccupation and concern.

## Remain Within Empire

New Zealand Will Not Become An Independent Sovereign State

Up to the present New Zealand has taken no steps to adopt the statute of Westminster, according to a paper presented at the fifth biennial convention of the Institute of Pacific Relations by W. A. Curzon-Siggers, lecturer in public international law at the University of Otago.

According to Mr. Curzon-Siggers it is doubtful if New Zealand government will proceed any further with the statute of Westminster which gives greater independence to the Dominions. New Zealand is satisfied with her present position within the British Empire and will not become "an independent sovereign state."

## Curfew For Parents

Windsor, Ontario, will again strictly enforce a curfew law which provides that all children under the age of sixteen shall be in their homes by 9 p.m. The next arrangement should be for one of the parents to be home to receive them for experience shows that it is usually gadabout preceptors who have taken their children, states the Brantford Expositor.

## May Have Trip To Canada

Mr. and Mrs. C. W. Lawrence, who have looked after the comfort of Canadian Bilety teams in the Canadian hockey team, are expected to make a trip to Canada if plans of Canadian marksmen mature.

## WORLD HAPPENINGS BRIEFLY TOLD

Russia had a favorable balance of trade for the first six months of 1933—for the first time since 1929.

Gold held by the Minister of Finance on July 31 was \$71,929,298 or \$601,832 in excess of statutory requirements. Dominion notes in circulation totalled \$182,113,558.

Twenty million feet of British Columbia lumber have left for world markets. Three-quarters of it is destined for China on the Dominion-subsidized service.

High import duties and other emergency measures will be continued as part of the Italian government's program to maintain a sound internal wheat market, Premier Mussolini has announced.

Raymond Poincaré, France's war president, was serenaded by the town band while he received felicitations from neighbors at a quiet celebration of his 73rd birthday at his summer estate at Sampigny, France.

Caught in full foliage by a surprise snowstorm on August 21, trees were broken and flower gardens ruined at Butte, Montana. The maximum temperature for the day was 44 and the minimum 31.

Captain William J. Weber, 65, steward at Rideau Hall during the term of Earl Grey as governor-general, and for many years on the staff of the Dominion archives, died recently at his home in Ottawa.

New comic ray studies announced by Dr. Robert A. Millikan, of New York, indicate these rays constitute a power-house of energy from 30 to 800 times greater than all the rest of the radiant energy in the universe.

One of the men who discovered the route to Klondike gold fields via Great Slave Lake and Yukon River, Robert Hargrave Milvain, 70, is dead at his home in Snowfield, England, according to word reaching Calgary. He was a pioneer resident of Calgary, locating there in 1886 to become a noted horseman and polo player.

### Now Comes Odorous Rubber

Chemists Find Zinc Carbonate Reduces Smell To Minimum

If rubber had no odor, it might find profitable uses in milk cans, beer kegs and food containers. From London, Canada has news that two chemists of the Rubber Growers' Association had located and practically eliminated rubber's inherent smell.

In "wild" rubber (collected from virgin forests), putrefaction produces a disgusting smell. But most U.S. rubber comes from man-made plantations. Plantation rubber gets its smell from the sulphur or nitrogen accelerators required to cure the rubber for commercial use. The Rubber Growers' chemists, H. P. Stevens and E. J. Parry, have been unable to find substitute accelerators as good as the smelly ones. On the other hand they found that zinc carbonate added during the manufacturing process reduced smells to a minimum, and very simply. More complicated and costly is the purification of the latex (the original rubber fluid tapped from the trees) by digestion with dilute caustic, centrifuging, creaming, dialysis, or ultra-filtration.

### Fragment Of First Cable

Fisherman Brings Up Piece Of Line Laid In 1855

While hauling his trawls off Cape Ray recently a fisherman dragged up from the ocean floor a fragment of the first submarine telegraph cable used in American waters. It was a piece of the line laid in 1855 by Professor Samuel Morse and Cyrus W. Field between Aspay Bay, Cape Breton, and Cape Ray. The cable was manufactured in England, the first stranded conductor ever made. Despite its long immersion, the insulation retained its odor of gutta serena. Until 1866 the eastern extremity of telegraphic communication was Cape Ray. Off that point westbound ocean liners dropped overboard canisters containing European newspapers and dispatches and telegrams from passengers. A boat was always stationed there to pick up the canisters. Newspaper men condensed the dispatches and put them on the wire, bringing news of world events to New York ahead of the steamships.

### Not To Be Ought

The company promoter was trying to raise capital for a new scheme. "I'm telling you," he said to a financier, "it will make gigantic strides later on. Just now, of course, it's only in its infancy." "Perhaps," replied the financier, "but I'm not in mine."

W. N. U. 2098

## Aluminum Ore Found

Discovery Is Reported To Be First In Canada

Discovery in the Kistino district of a great body of aluminum ore-bearing clay has been reported to the government by Dr. David Flood, geologist, who has spent six years investigating in the north country. He states that the discovery is one of the most important to have been made in the history of the province.

Early development of the area, which lies five miles northeast of Kistino is forecast by Dr. Flood, who has made a full report to the government on his find.

The discovery also means, according to the geologist, the earlier development of the hydro-electric project east of Prince Albert, the proposed site of which is just 12 miles from the ore-bearing clay.

This is the first discovery of its kind in Canada. Dr. Flood said there is a small deposit of aluminum in Arkansas, but the bulk of the world supply comes from British Guiana.

Dr. Flood, who is a native of Sweden, also touched upon the other mineral possibilities of Northern Saskatchewan and states that North Saskatchewan would one day produce gold, silver and nickel. He found them all, he declared, in his wanderings as chief geologist for a big syndicate.

## Recipes For This Week

(By Betty Barclay)

### EMERALD ECHO SALAD

- 1 package lime-flavored gelatin.
- 1 pint canola or olive oil.
- 1 cup canned crushed pineapple, drained.
- 3 tablespoons pimiento, cut in strips.

Dissolve gelatin in warm water. Pour 1/4-inch layer in loaf pan. Chill until firm. This remaining gelatin mixture until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater, until fluffy and thick like whipped cream. Fold in pineapple and pimiento. Pour over first layer. Chill until firm. Unmold on crisp lettuce or chrysanthemum. Serve with mayonnaise. Serves 8.

### CORN SOUFFLE

Mix in a saucepan two tablespoons of flour with one tablespoon melted butter. Pour in slowly one cup of milk. Bring to the boiling point. Add one can of corn, one teaspoon sugar, one teaspoon salt, pepper to taste, and the well-beaten yolks of two eggs. Fold in the whites of the eggs, beaten stiff. Then turn into a buttered baking dish and bake in a moderate oven. Serve immediately.

### Checking Up On Wild Fowl

United States Naturalist Makes Tour Of North Land

No estimate of the prospects awaiting local hunters was forthcoming from Luther J. Goldman, field naturalist and biologist of the United States Department of Agriculture, who was in Prince Albert recently.

Mr. Goldman has been making an extensive trip studying migratory fowl conditions on behalf of his department.

"The vast areas of Canada's northland of which, because of its nature, we have only scratched the surface, forbids any estimate of increase or decrease in the number of ducks year by year," said the investigator.

The drought conditions of the south, which have driven the birds from usual nesting places, will also have its effect on this year's duck breeding, thought Mr. Goldman.

Leaving California in June, Mr. Goldman has travelled over a large area including the southern portion of Alberta and Saskatchewan, then on into the north. He now expects to swing into northern Manitoba, then on to eastern Canada, and back to the States, where he will report on conditions prevailing in Canada which information is used by the United States department in setting the bag and time limits for the open season.

### Knit Own Wool Blankets

The low price which Canadian farmers' wives receive for their wool has introduced the knitted blanket to Manitoba farm homes. The Manitoba Handicrafts Guild has shown them how to knit blankets from the raw wool pulled out into loose, thick strands.

Linooleum does not have to be scrubbed so often if varnished or shellacked, then waxed.

Small mine owners in Bolivia find it difficult to get workers.

By Ruth Rogers

749

AN EXCEEDINGLY WEARABLE DRESS

All you have to decide is the color.

Whether you want a dress for street, afternoon, or office wear, here's your number.

For town and office wear, it looks so smart and trim in light navy blue crepe silk. And it takes but 30 minutes of 30-inch material for the 30-inch bust.

Prints in crepe silk in blue and white or in red and white are stunning too.

For afternoon, grey or beige crepe silk is especially nice.

Note the close sleeve detail to give the fashionable wider shoulder line. And the bias seaming that makes the bodice "fitting."

It's a very simple model to make. There are so few major parts to the pattern.

Style No. 749 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## British Railways Have Complete Moving Service

Pack and Unload Goods and Help With Settling

Did you know that British railway companies would lay your carpets and linoleum for you—or even move your lawn? says London Answers.

These things, if desired, are part of the very comprehensive service that is run by the British railways. The furniture is packed by experts into special containers which is shipped by rail as it stands. At the other end the container is taken by road to the new home, where it is unpacked. It is at this stage that carpets and linoleum may be laid, pictures hung, linen, utensils, etc., transferred to shelves and cupboards—and the lawn made presentable.

Over fifty removals are carried out daily by the railways—some of them at very short notice. You may give your instructions to the company in the morning and your furniture be on its way early in the afternoon.

And it isn't only household removals that are catered for. The railways will move a farm—live stock, implements, and so on—between one milking time and another, or transport a factory in production from its former home to a new building.

Keep Away From Airmen

Aviator's Wife Says Marry Man Who Keeps Feet On Ground

"Never marry an aviator," advises Mrs. Wiley Post, wife of the round-the-world flyer. "Find a husband who keeps his feet on the ground."

Doubtless when Drake sailed round the world, young ladies of his day were warned against marrying sailors. And the advice would receive just the same consideration.

Fortunately, human nature is such that, while some women find their ideal mates in the adventuring male, their sisters achieve greatest bliss through marriage. The "foote on the ground" rule, if it is to progress, needs both types—London Sunday Pictorial.

### Lays Foundation Of Fortune

Indiana Man Plants Walnut Trees As Legacy For Daughters

By planting, in his spare time, 14,000 walnut trees on 29 acres of overland, J. E. Lemmon, of Washington, Indiana, has laid the foundation of a fortune for his young daughter.

In 1904, according to the national forestry department, 8,600 of the trees should have survived and reached maturity. They will be worth, at present low prices, \$160,000 as timber wood. Should the daughter wish to keep them, they should in 40 years be producing an average of one bushel of nuts each which at \$1 per bushel will give her an annual \$8,000 income.

Calif Was Good Swimmer

Two of a load of calves being transported by truck across Montreal's harbor front recently escaped from the truck. One struck off through the city and was soon caught, but the other headed for the river and, swimming downstream had gone nearly a mile before being hauled and brought to shore in a fast motorboat.

Wonderful models of aeroplanes used for official tests are made by a Reading, England, man in his kitchen.

## CUBA'S GRATITUDE FOR WELLES

Credited with being the moving spirit behind the change of regime in Cuba, U.S. Ambassador Sumner Welles, welcome visitor at the Presidential Palace in Havana, where he is shown with Cuba's new President, Carlos M. De Cespedes (left). At the right is Colonel Kimberley, military attaché at the U.S. Embassy.

## SUNDAY SCHOOL LESSON

SEPTEMBER 3

DAVID

Golden Text: "Man looketh on the outward appearance, but Jehovah looketh on the heart."—1 Samuel 16:7.

Lesson: 1 Samuel 16:1-13; Psalm 78:7-12.

Devotional Reading: Psalm 101:1-8.

### Explanations and Comments

Samuel's Mission To Bethlehem, verses 1-3.—Saul's failure caused Samuel sorrow. He realized that he must take definite action about Saul's successor, that this was God's will. He must go to Bethlehem with a flask (horn filled with oil) to anoint one of the sons of Jesse as the Lord's chosen king. Yet he hesitated to go. Would not Saul kill him if the fact became known? Then a way out of the difficulty came to his mind; as a matter of prudence he would give as the object of his visit the holding of a sacrifice, and would keep silent about the more important reason for his coming. He would give one reason for his visit, which was a true one, and would say nothing about another reason, which was under no obligation to divulge.

"It was not concealment the object of which was to mislead any one, but a device whereby to do what he would not have done had the whole truth been known to him. When concealment is practiced in order to take an unfair advantage of any one, or to secure an unworthy advantage over him, it is detestable. But to conceal what you are under no obligation to reveal, when some important and is to be gained, quite a different thing."—W. G. Blake.

"A man always is to himself the judge of how much of his mind he will show to other men. There are imperious inquiries made, you will say, to leave the inquirer unformed on that matter; not if you can help it, misinformed but precisely as he was."—Carlyle.

Samuel's Reception In Bethlehem, verses 4, 5.—When Samuel reached Bethlehem the elders of the city came to meet him trembling, and said, "Comest thou peaceably?" It had been Samuel's duty as judge to go from town to town to render judgment and punish offenders (1 Sam. 7:16), and the elders feared he had come to the town for that purpose. Samuel reassured them when he said: "I am come to sacrifice unto Jehovah; anoint yourself, and come with me to the sacrifice." Before participating in any sacred act the Israelite "sanctified himself by ablutions and by refraining from whatever would make him ceremonially unclean. Samuel himself superintended the purification of Jesse and his sons, and called them to the sacrifice. Jesse was now an old man."—Sawyer.

The Selection Of The King, verses 6-12.—When they came to the sacrifice, Samuel looked upon the sons of Jesse, and said to the Lord, "Surely Jehovah's anointed is before me." But Jehovah spoke to Samuel, and he is told. The young man is the one. The prophet is described as carrying on in the depths of his conscience a dialogue with God, as the son of Jesse, after another, passed before him. Eliah was another Saul, tall and slender, with a fine physique, but he was rejected him; for Jehovah seeth not as man seeth; for man looketh on the outward appearance, but Jehovah looketh on the heart.

"An apple may look fair to the eye, but be full of rottenness within; so, on the other hand, the fruit may be brown, and speckled with spots, and burrowed by wasps in search of its sweetness, but if we cut it open, and find it sweet in its substance and sound to the core, it is good. It is just the same with man in relation to his God." Man judges by seeing; Jehovah, by feeling. What thou art before God, that thou art and nothing more! Abinadab, Shammah and four more of Jesse's sons passed before Samuel and he rejected them all. "Are these all thy children?" he asked Jesse. On learning that the youngest was away keeping the sheep, Samuel ordered him sent for, declaring that they would not sit down to the feast which followed the sacrifice until he arrived. And Jesse sent for David.

David appeared—nuddy (this means either he had red cheeks or that his hair was auburn), and withal of a beautiful countenance, and Samuel knew at once that he was the chosen one.

In the hour of David's anointing it dawned upon him that he was a selected life—that he was set apart for an unusual destiny; what thought is greater than this to a soul that is noble?—C. C. Hall.

### Speeding Up Mail

Fast Plane Is Undergoing Final Tests In England

Speedy mail plane which can fly at 200 miles an hour, is undergoing final tests in England. It is fitted with special apparatus for dropping and picking up mails while in flight, and in all 9,000 letters, weighing half-a-ton, can be carried. These could be flown from London to Capetown in 48 hours and from London to every country in Europe, with the exception of Turkey and Greece, in less than seven hours.

Thirty-three thousand, three hundred and seven sheep, 22,871 cattle, 18,242 dogs, 10,000 calves were shipped from western to eastern Canada during the first twenty-four weeks of this year.

## Canada A Healthy Nation

Bulletin Of Life Insurance Company Gives Interesting Facts

The lowest mortality on record was registered for the first six months of 1933 among nearly 1,250,000 Canadian industrial policyholders of the Metropolitan Life Insurance Company and the prospect of a new minimum death rate being established in Canada in 1933 is considered excellent.

The death rate for all causes combined among this group of Canadians is 4.6 per cent lower than for the first half of last year. Canadians are making a better health record this year than are United States industrial policyholders, for the death rate of the latter is running well over three per cent, higher than for the first six months of 1932.

Reductions among Canadian policyholders from previous low points for diseases of major interest, according to the insurance company's statistical bulletin, are as follows: diphtheria, 67 per cent; tuberculosis, 1.6 per cent; diarrheal complications, 17 per cent; typhoid fever, 57 per cent; and measles, 12 per cent.

Pointing out a number of decided contrasts in the course of the death rates from important diseases this year in Canada, and the United States, the bulletin says:

"The mortality from diabetes, which had been steadily rising in both countries for years, has recorded a considerable drop in Canada; in the United States it is marked upward trend is still persisting.

The heart disease death rate is unchanged this year in Canada, whereas in the United States cardiac conditions have been responsible for many more deaths than in the like part of 1932.

"The cancer mortality rate has risen only negligently in Canada; but it has come up appreciably in the United States. Deaths from pneumonia, on the other hand, have increased a little in Canada as compared with a pronounced drop in the United States to a new low point."

### People Buying Insurance

Sales Total In Canada For July Thirty Million Dollars

A total of \$1,395,000 of new paid-for ordinary life insurance was written in Saskatchewan last month, according to figures compiled by the Life Insurance Sales Research Bureau.

Saskatchewan's total, written to boost the Dominion total, helped to 14 companies having 83 per cent of the life insurance in force, to \$30,500,000 for July, the figures show.

Sales totals by provinces were: Alberta, \$1,249,000; British Columbia, \$1,968,000; Manitoba, \$1,908,000; New Brunswick, \$735,000; Nova Scotia, \$1,020,000; Ontario, \$12,861,000; Prince Edward Island, \$53,000; Quebec, \$3,750,000; Saskatchewan, \$1,395,000.

In Newfoundland sales by the same companies totalled \$267,000, an increase over the corresponding month of 1932.

### An Underground Farm

Mushrooms To Be Grown In Famous English Caves

England may soon have its first agricultural industry to be conducted 120 feet below ground. If experiments now under way are successful, the famous Chislehurst Caves, near Bromley, will be converted into the greatest mushroom growing centre in the country. The British Mushroom Company has been started to farm the caves. W. E. Masters, one of the principals, said: "The caves are ideal for growing mushrooms, which need darkness and an even temperature. The value of the metal at current prices is nearly \$500,000. Experiments by researchers indicate that the process of electrolysis proves more efficient than the other methods. Electrolytic methods employed at one large film studio saved \$17,000 in six months. Twelve hundred trays of silver could be regained from every million feet of film developed.

### Preventing Silver Waste

Loss In U.S. Runs To Thousands Of Dollars Annually

Science is endeavoring to find some convenient way to recover the one hundred tons of silver that is annually dissolved away in developing photographs in the United States. The value of the metal at current prices is nearly \$500,000. Experiments by researchers indicate that the process of electrolysis proves more efficient than the other methods. Electrolytic methods employed at one large film studio saved \$17,000 in six months. Twelve hundred trays of silver could be regained from every million feet of film developed.

## Feeling Business Recovery

Lumber Operators Preparing For Elg Cut Next Season

Signs of business recovery are evident in Canada's northland, according to Dr. J. B. Phillips, Department of Chemistry, McGill University, who has just returned to the university after spending some three weeks in a wild area west of the upper reaches of the Ottawa River. Dr. Phillips combined business with pleasure. Travelling some 200 miles by canoe, with Lorne MacLaren, of Buckingham, Que., he secured a number of samples of promising copper ore from a district that heretofore has been shunned by geologists.

Tests here are to be followed by a second trip into the northland before the opening of the university session. There are indications that gold and silver will also be found in the new copper ore district.

Everywhere they went there was talk of recovery and better times. Dr. Phillips said. Experienced lumberjacks, who have been eluding out a bare existence by trapping during the last winter or two are getting ready to join in the recovery movement. Large lumber operators are sending their men into the bush getting ready for a big cut next season.

Camping the first night a short distance from the car, the two were awakened at midnight by raucous signal of the automobile horn.

Grabbing up their flashlights, they rushed toward the car to chase away the marauder and found a porcupine sitting on the steering wheel. The porcupine had his forefeet firmly on the horn button and refused to budge. They played their flashlights on his eyes until he turned tail and ambled out of the car.

## Mountain Climbing Fatalities

Four British School Masters Lose Lives In Switzerland

Word was received at Eton College recently that four of the school's masters had been killed in a mountain climbing accident in Switzerland.

Bodies of the men, who left England several days ago for a holiday, were reported found at the foot of a steep wall of rock on Rigi Peak in the Bernina Massif. The victims were H. E. Howson, E. V. Slater, E. W. Powell, all housemasters, and C. R. White-Thomas, assistant master and eldest son of the Bishop of Ely. Powell, widely known as one of the best mountaineers in the world, was an old Oxford Blue and winner of the Diamond Scuffs of Henley in 1912.

## History May Be Repeated

Cattle Sailed Hudson's Bay Route 200 Years Ago

Re-opening of shipping activities at this Hudson's Bay port and the move to establish it as an ocean outlet for livestock shipments to the United Kingdom recalls the fact that 200 years ago, a cattle shipment arrived at Churchill from England. The frigate "Mary," which arrived from England on August 8, 1783, brought two oxen and two bulls. They were used to haul stone for the building of Fort Prince of Wales. Ruins of this now historic fort are still to be seen at the harbor entrance. It took years to build the structure, considered one of the strongest on the North American continent.

## Taking No Chances

Two yokels visiting a big city saw a double-decked bus for the first time. Boarding it both went inside, and one of them lit a cigarette.

The conductor politely told him to go upstairs if he wanted to smoke, so up he went.

A couple of minutes elapsed. Suddenly he came rushing downstairs and sat down beside his pal, who asked him what was wrong. He said: "It's no safe upstairs—there's no driver up there!"

## Had Good Excuse

Book borrowers who forget to return the loan are seldom as honest as a former student of St. Andrew's University, Scotland, who borrowed a copy of Plato's "Republic," fifty years ago. He has just returned it with the apologetic explanation that though he has kept it so long he has been too busy to finish reading it.

## Veteran Water Diviner

Although he will be 88 in a few days, Joseph Wriglesworth is journeying into the Sooke hills to find a water well for a client. He has many times demonstrated his skill as a water-diviner. He has been in British Columbia since 1862, when he arrived from England, and took part in the Cariboo gold rush.

W. N. T. 2009

## Canadian Insurance Companies Are Sound

Have Come Through Lean Years With Flying Colors

At a time when doubt is being cast in many directions as to the soundness of financial institutions, and when many have found it difficult to stand up beneath the strain of the depression, it is more than gratifying to Canadians to learn that their insurance companies have come through the lean years with flying colors, particularly so because the people of Canada rank as the second best insured people in the world and today sixty-seven per cent of Canadian insurance is with Canadian companies.

With the enormous sum of \$1,750,000,000 of accumulated premiums, Canadian insurance companies are playing an important and increasing large part in the upbuilding of the Dominion through financing all sorts of industrial, commercial and Government undertakings. That there have been losses in the course of this stands to reason. But they have been such as are met with in any ordinary carefully conducted business undertaking.

And it speaks volumes for the Canadian insurance companies as a body that never since they first began operations in this country has any Canadian policy holder lost a dollar through the failure of any company holding a Dominion licence.

—Montreal Star.

## A Cave Of Champagne

Thousands Of Cases Kept Beneath "White Cliffs Of Dover"

It is not generally known that beneath the "White Cliffs of Dover," so often celebrated in poem and song, is a grim cave which contains many thousands of cases of champagne. The walls and roof are scarred by the nails of French prisoners who were forced to build the cave during the Napoleonic wars.

After the wars were over, the cave became the peaceful dwelling of the barrels from a brewery. Then wine took the place of beer, during the World War cases of Hook and Moselle lay side by side with mines and explosives placed there by the Dover garrison.

Today the champagne that subsequently bubbles on the tables of the city of London livery companies lies stacked in the cave. Every night the "champagne ships" leave Calais for Dover to replenish the stock, which is guarded by a solitary watchman in a seaman's jersey. And in the morning a horse and cart appear, laden with cases stamped and examined by the customs, and a fresh consignment takes its place among the others, some of which have lain in the cave since the war.—London Correspondent.

## Want Representation

Western Indians Would Have Voice At Pacific Relations Conference  
Chief Hector McLean, Indian grand chief of the University of Manitoba, petitioned Sir Herbert Samuel to his good offices to secure representation for McLean's tribe, the Stony, at the conference of the Institute of Pacific Relations. He believed he spoke also for the other Indian tribes of Canada.

Chief McLean said the Indians wished to submit certain matters of interest sociologically to the conference to the end they might be taken up by the Dominion and British Governments.

Sir Herbert replied he was sorry he could not act in the premises but, as this was strictly an internal affair, it did not fall within the scope of the Institute's activities.

## Only Reason She Knew

A young barrister, in a harrising cross-examination of a landlady, was trying to discredit her boarding house in the eyes of the jury.

She spoke of certain lodgers who never went out at night, and the barrister pounced upon her at once. "A queer set of people seem to live in your house, madam," he said. "Is there some reason for hiding themselves from the public?"

"They're studying for the law," replied the landlady.

## Biggest Broadcasting Studio

Radio broadcasts are to be shown to the public in London. There the biggest broadcasting studio in the world is being erected. The whole of the National Hall, at Olympia, is being converted into a studio with seating accommodation for 2,000.

According to scientists the sun and its planets are rushing 130 miles a second in the direction of the southern constellation of Dorado, the Dragon.

## SLUM CHILDREN'S "SEASIDE" IN SHADOW OF HOUSES OF PARLIAMENT

The sand-pit in the Victoria Tower Gardens adjoining Lambeth Bridge, is a favorite resort for youngsters from the poorer districts of Westminster and Lambeth.

## Increased Car Loadings

Grain and Grain Products Help To Increase The Total

The upswing in cars loaded on Canadian railways, which began at the beginning of the present month has continued, and for the week ending August 12, the figure exceeded by 869 the number of cars loaded for the corresponding week a year ago. Totals were 37,775 for the week ending August 5, and 38,844 for last week.

Grain and grain products increased by 1,040 cars, from 4,700 to 5,740, while coal loadings were up by 434. Pulpwood, ore and miscellaneous freight increased, while livestock rose by 147 cars.

Commodities with decreased loadings compared with the week ended August 5, were: coke, lumber, pulp and paper, and other forest products.

## Third Of Road Built

Work To Continue On Lake Louise Scenic Highway

Over 50 miles, or one-third of the Jasper-Lake Louise scenic highway has been built while relief work will be continued on the road throughout the 1933 season, according to Hon. Thomas G. Murphy, federal minister of interior.

It is proposed to resume work on the Jasper Highway west to the British Columbia boundary when crewing a road to Miette Hot Springs.

## Proved Trip Possible

Two young medical students who risked their lives to prove they could saddle a 22-foot canoe from Nikan, Ont., down the treacherous Drowning, Kenogami and Albany Rivers to James Bay, and then make their way down the western coast to Mooseone, completed the trip.

Employment has been increasing in Hungary recently.

## World's Quietest Place

Room In Holland Specially Built For Scientific Research

The quietest place in the world is not the summit of a high mountain or a distant place in the middle of the ocean, of an isolated spot in the desert.

It is in the heart of the city of Utrecht in Holland. In this quiet place is a room for scientific research, specially built to avoid all vibration. Professor H. Zwaardemaker, a well-known Dutch physicist and physiologist, had it built.

Professor Zwaardemaker built three rooms, one inside the other; then, since a vacuum is a poor conductor of sound, he had the air all pumped from between the walls. The interior walls of the rooms were covered with six layers of materials; one layer was of stone blocks, treated by a special process. The cavities between the stones were filled with borax; next to the stone were placed layers of wood and cork. The other coverings were layers of lead plate, sea grass and paper.

The walls were further lined with tapestry, to absorb the internal sounds. Not the slightest sound can penetrate to the innermost chamber.

## Aid Prisoners To Escape

Secret Organization Said To Assist Escapees From Devil's Island

British Guiana police are convinced that a secret organization in Cayenne assists prisoners to escape from Devil's Island and other French penal colonies in French Guiana. It is held that branches of the society exist in Trinidad and Venezuela to help convicts reach Colombia.

More than 300 fugitives from Cayenne have passed through British Guiana this year after braving the terrors of the jungle and sea. Forty escaped by way of British Guiana in 1932.

## Forestalling The Cutworm

Outbreak Is Expected In Western Localities Next Spring

A warning has been issued by the Entomological Branch, Dominion Department of Agriculture, that the conditions this spring in certain areas of Saskatchewan and Alberta, west of a line drawn north and south through Regina, have been such that a more extensive outbreak of the pale western cutworm may be expected next year. The adult of the pale western cutworm is a grayish moth which begins to fly and lay its eggs from the first of August to the fifteenth of September. During that time any land that is being cultivated, pastured, harvested, or distributed in any way, is likely to receive eggs and be infested next spring. It is the opinion of the Entomological Branch that, since the eggs are laid only on loose soil, any field being summer-fallowed should be kept free from weeds and then left entirely undisturbed until after September 15th. It is also urged that land which is harvested between August 1 and September 15 be not seeded next spring until it is known definitely that no cutworms are present.

## Canada's Newest Seaport

Traffic Out Of Churchill Expected To Be Double Of What It Was Last Year

Traffic out of Churchill, Canada's two-year-old seaport on Hudson Bay, is expected this year to be double what it was last year. More than 5,000,000 bushels of wheat will be loaded by 20 ships before the middle of October compared with 2,738,000 bushels in 10 vessels last season. Two trial shipments were made in 1931 by ships chartered by the Dominion Government.

The first ship to dock at Churchill this year was the "Pennyworth," which left Glasgow, Scotland, on August 17 and arrived at Churchill on August 13. She brought 4,466,000 pounds of freight, which will be carried from Churchill over the Hudson Bay Railway. This line connects with the Canadian National Railways system at The Pas, 550 miles from Churchill. A substantial increase in the quantity of incoming freight to Churchill this year is indicated.

The port of Churchill has every modern facility for the handling of ships and the loading and unloading of cargoes.

## An Archaeological Find

Butter, 2,700 Years Old Discovered In Good Condition

Hazelnut butter 2,700 years old and still in good condition was the archaeological find recently examined by Professor Dr. Johannes Cruss of Berlin-Rahmsdorf.

A warning, as described by Professor Cruss, consisted of two lumps about the size of plums, found with the remains of a man of the Iron Age, about 800 B.C., in a grave near the town of Buitingen. The body had been cremated before burial, and the urn containing the hazelnut butter was in the fire. This thoroughly sterilized the earthen vessel and its sealed-in contents, coating the fat with a carbonized layer that constituted a second protective covering. Consequently in all the centuries bacteria and fungi had been unable to penetrate to the fat and spoil it. It was identified as hazelnut fat by particles of carbonized nutshell embedded in it.

## Lent A Hand

Premier Mussolini Helps To Pull Cannon Out Of A Hill

Premier Mussolini lent a sturdy hand to assist in pulling a cannon up a hill during the recent army manoeuvres in Italy.

He arrived by automobile while artillerymen were struggling to drag a gun into position.

"I'll give you a hand, too," the premier said. He tugged sturdily while a sergeant shouted, "heave" and the gun sped up the hill. The artillerymen cheered him.

## Girls Of India Modern

Hindu women of the middle class have won their fight for the right to look pretty in public. The modern Indian girl may now powder her face, wear her hair in curls, or have a permanent wave, look frequently in a mirror, and replace a broad sari streak on the forehead by a small circular mark.

## Unique Bookstore In Japan

The most unique bookstore of its kind in the world is located in Japan. It makes the boast that every single book published—non-fiction as well as fiction, is available within two months of publication and kept in stock thereafter. What a country!

## Dreaded Sleeping Sickness

Disease Is Said To Be Rapidly Spreading

Sleeping sickness is one of the worst growing diseases.

Although known for two or three hundred years, it is only since the Great War that this fatal malady has been reported of world-wide occurrence. Little of it was known in the United States, until after the "flu" epidemic which swept this country in wartime 1918.

The cause is a specified virus, which has escaped isolation and identification. The virus is invisible even under microscopes. Its effects are similar somewhat to those of infantile paralysis. Like the paralysis the sleeping sickness virus attacks or has a special affinity for the central nervous system. Paralysis and the sleeping sickness, however, attack different areas.

In one form which produces progressive lethargy and stupor the virus attacks in or about the third pair of cranial nerves. This pair is one of the large nerve channels. It controls the movement of the eyes. The sleepiness which gives the disease its popular name does not, however, come from the fact that these eye nerves are affected. The stupor is induced by general brain involvement. The direct effect of the virus upon the eye motor nerves is distortion of vision. The distortion is the "ophthalmoplegia," which is one of the names of the disease. Dr. Milton J. Rosenow, one of the authorities on sleeping sickness, says that this ophthalmoplegia occurs in about 75 per cent of the cases.

According to Dr. Rosenow, the mortality is high, the "incidence" of the disease low, but this incidence is growing slowly. He says that almost no other infection is so irregular, and has so many different forms.

## Refuge For Jews

Says Palestine Should Be Made Available For Thousands

The 19th World Zionist Congress, Dr. Selig Brodetsky of Great Britain, told the gathering, "must decide upon a course of political action which will make the nations of the world learn the truth about the situation of the Jewish people, and about Palestine as the salvation."

"Above all," he declared, "Great Britain must learn this. We must plead with the other great nations and appeal to the League of Nations, which represents the concentration of the conscience of humanity." Previously the speaker asserted Palestine should be made available to "tens of thousands of German Jews" who have left Germany since the accession of Chancellor Adolf Hitler. A warm reception was given Professor Albert Einstein when he arrived to attend the congress.

## No Longer Tedious Trip

Toronto Can Be Reached From Vancouver In 37 Hours

Vancouver to Toronto in 37 hours is a trip that can be made any day of the year now, Mrs. B. Flaherty, buyer for a coast firm, has discovered. Leaving Vancouver at 4 p.m. on a recent Wednesday, she took a liner of the United Alaways at 9 p.m., arriving in Chicago at 3 p.m. Thursday. Then, after three hours' shopping she took the night train for Toronto, arriving 8:30 Friday morning, having spent 37 hours in travel. Had her destination been New York, the entire trip would have taken only 29 hours.

## Thousands Of Night Workers

New York has 400,000 men and women who sleep by day and work by night. The rest of New Yorkers may eat new bread for breakfast, drink fresh milk, read newspapers and perhaps also certain letters under the clock before beginning a day. They sleep in hushed homes with blinds down and are busiest when most others are dead to the world.

## Should Help Business

The biggest department store in Cairo, Egypt, draws a number monthly from 1 to 30 or 31 (excluding Sundays and holidays) and any customer who buys anything in the store on the lucky day drawn, gets 100 per cent refund.

## No Heading In Bed

King George, while inspecting a bedroom at the advertising exhibition at Olympia recently, on observing a reading lamp, remarked: "Woe I go to bed to go to sleep, I have not read in bed for 40 years and I am not going to start now."

Brazil has appropriated large sums to aid its drought sufferers.

## Occasional Wife

BY EDNA DOWDY WESTER  
Author of "JACQUETTE"  
LIPSTICK GIRL

## SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly admires him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means, but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist, Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park.

(Now Go On With the Story)

## CHAPTER VI.

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. Some instinct told him that she needed him, yet he feared to remain. He glanced away toward the glaucous green of new leaves toward the gleaming white walls of the museum.

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lightened. "Then, that is why I haven't seen you, isn't it?"

"Yes, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," he laughed, "and it's not that I can't stand the pace, but the profs won't stand for it."

"I'm sorry. Did you get razzed about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?"

"Wonderful! Did you?"

"Best in my life!" he declared.

"Then—you haven't—avoided me because you were angry with me?"

bestiality.

"Of course not! And I haven't tried to avoid you," he prevaricated. "What made you think that?"

"Well," her eyes followed the toe of her slipper as it drew imaginary lines in the grass, "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She looked up at him again with shining eyes. "Then it's all right," she said softly.

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently. "I should have phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me." She forfeited her last ounce of pride in a final desperate appeal.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house—"

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming. Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts?

"Do you mean that you would like to come here—and talk with me—sometimes?"

"Any time. I often come here and sit alone in the evening. I never knew, though, that you were teaching over there, so near me."

"And I never knew you were so

## "NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It steadies the nerves... makes you eat better... sleep better... relieves period headache and backache... makes trying days endurable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

W. N. U. 2009

near, either. Will you be here, tonight?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised.

They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget—probably he never could—but he had been determined not to see her alone again. Now he had yielded again.

But what could he do, when a girl who could go anywhere with anyone she chose declared that she preferred to sit and talk with him in the park? More than that—when he longed with an intense and twisting ache to be with her every moment that was possible.

He found her there as she had said she would be, when he hurried away from his class that evening. As he approached she arose and went slowly to meet him. She wore white—a soft woolly white jacket, of which the collar snugly closed against her black hair. The night was breeze-cool. She was bareheaded, and the black hair in the depths of the white collar was like the blackness of her eyes in the depths of her white face.

Her gaze was wistful, he thought, as she greeted him.

"You didn't expect I would be here," she challenged.

"I hoped you would be," he assured her.

"I've been here all the time you were teaching your class. It seemed a long time."

"It's about the longest hour I ever had," he confessed.

"Shall we walk a little? It's a marvelous night, isn't it?"

"Perfect. I like to walk around here at night. It all seems so different than in the daylight. Did you ever feel like that—as if a place that is very familiar to you in the day were a different place at night?"

"Yes, I've thought that, too. It's something like the difference between the way people appear to be and the way they are, isn't it?"

"Why," he exclaimed with surprise, "you really little thing! I never knew you could be so serious."

"You see, I am like this park by day and by night—a dual personality. You know the man who sketches poorly in Professor Drake's class, but you don't know the man who comes to sit alone in the park and try to think things out."

"I like both of you." His voice was deeply tender with the force of suppressed emotion.

"But you don't know either of me," she objected, holding up her finger in a warning gesture.

"Perhaps better than you think."

"But you must not like me very much."

He felt reprimanded for his boldness. "I know, I shouldn't be so presuming. But I wonder why you came here tonight to meet me."

"Because I have to tell you something that I want you to know about me. I just can't go on letting you think I'm—"

"Are you sure that you should tell me anything about yourself?" he interrupted hastily. "I shouldn't want you to tell me something you might regret later."

He sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—for sympathy? Was it possible that, even yet, girls

But I have learned to read The thoughts beneath the mask: The longing and the need, And I have found behind Grim looks and visage cold Hearts that are true and kind. Where dreams like flowers unfold.

In masks men often go In masks of scorn or mirth; But, safe beneath, I know Are honor, valor, and truth. Ah, it is good to feel, In spite of masks men wear, Life's light and love reveal. The virtues hidden there.

Young Women Win Prizes

Have Fine Exhibit of Cooking At Edmonton Fair

Looks as if the days were over when newly weds had to go home to mother if they wanted to get a "eat-able" meal when the only kitchen utensil a bride knew how to use was a can opener, and when a bridegroom suffered constantly from indigestion through his loyal efforts to eat his wife's dishes.

At the Edmonton Exhibition a bride of less than a year carried off three first prizes in cooking. And there were more prize-winners among young matrons and girls than ever before.

An older woman who for years has won a substantial number of prizes, admitted that she had been badly beaten this year. Officials of the fair felt that cooking schools were partly responsible for the very fine baking that made up the show.—Toronto Telegram.

Fined For Smuggling

Store Keeper In Ireland Found Law Was Strict

Because his employee carried a bag of food from one part of his field to another, Thomas Kelly has been arrested and fined \$250 in Dundalk, Irish Free State, on a charge of smuggling. Kelly owns a field which lies in both the Free State and in Northern Ireland. He opened a store on the Northern Ireland side. When one of his men carried the fuel from one shop to another Kelly was arrested.

Pretty soon there won't be anything else left for trans-oceanic flyers to do but to try flying over back-wards.

A man can live to be 100, but the trouble is, he looks it.

Argentine Needs Rain

Frosts Have Also Put Grain In Poor Condition

A Buenos Aires cable to the New York Times quotes a report of the bureau of statistics as saying Argentine grain crops are faced with disaster unless abundant rains materialize in the immediate future.

The report describes as "poor" the condition of growing wheat, flaxseed, oats, barley and rye, because of prolonged drought throughout the grain belt, and says the damage is aggravated by continuous frosts of an intensity seldom seen in Argentina.

## Electric Washing Machines

Demand For Hand and Other Power Machines Rapidly Falling Off

Electricity, which is abundant and cheap throughout the larger part of Canada, is rapidly providing the motive power for a variety of domestic appliances that were formerly propelled by hand. Take washing machines as an example: From 1927 to 1932 inclusive the number of electric machines manufactured in Canada totaled 345,051 compared with 105,289 hand machines and 13,905 other power machines. The demand for hand and other power machines is rapidly falling off. In 1927 a total of 21,841 of the former and 1,986 of the latter were made. In 1932 only 5,220 hand machines and 620 of other power machines were placed on the market compared with 47,340 electric machines that year.

There are 17 factories in Canada engaged in the manufacture of washing machines. In 1932 the total value of their output was \$3,241,323. Most of the washing machines used in Canada are of domestic make. Imports of such machines and parts and accessories last year were valued at \$338,089. The exports had a value of \$123,981.

They do them year by year And shut themselves inside.

But I have learned to read The thoughts beneath the mask: The longing and the need, And I have found behind Grim looks and visage cold Hearts that are true and kind. Where dreams like flowers unfold.

In masks men often go In masks of scorn or mirth; But, safe beneath, I know Are honor, valor, and truth. Ah, it is good to feel, In spite of masks men wear, Life's light and love reveal. The virtues hidden there.

The post office will be closed on Labor Day, Monday, Sept. 4th.

Get your School Supplies at the Chronicle Office.

Mr. and Mrs. H. Ballam and Mr. and Mrs. Chas. Fox spent Sunday at Sylvan Lake.

Mr. and Mrs. R. M. McCool returned on Sunday after spending a week holidaying at Sylvan Lake.

Constable R. C. Fenn, R.C.M.P., returned on Sunday after a holiday trip to the Pacific Coast.

Wm. Robertson, C.A. of Edmonton, is conducting the semi-annual audit at the U.F.A. Store this week.

George McLeod has a sunflower in his garden that has grown to a height of 9 feet 6 inches.

Gordon Young left on Monday to re-open the Midland-Pacific elevator at Academy.

Mrs. Mobbs and Miss Francis Mobbs of Calgary are visiting friends in town this week.

Mrs. Annon and daughter Beatrice of Wayne, are the guests of Mrs. Cruickshank this week.

Mr. and Mrs. Wm. Stralo are visitors in Calgary today (Thursday).

Mr. and Mrs. D. Bills and Norma Bills spent the week-end as the guests of Mr. and Mrs. P. Whitaker at Beynon, Alta.

Thos. Tredaway, Dr. McClelland and W. Miller attended the address given by Sir Herbert Samuel in Calgary on Monday.

Ed. Meyers returned on Monday from Montana where he had been visiting his brother and other relatives.

The regular monthly meeting of the Village Council will be held in the Fire Hall on Tuesday, Sept. 5th at 8 p.m.

Frank Trca brought in three large pails of mushrooms on Wednesday morning and gave them away to his friends. Mushrooms have been mighty scarce here this summer.

At a meeting of the parishioners of the Anglican Church held in the Fire Hall on Monday night, it was decided to build an addition to the church in the near future.

**FREE**—A drawing portfolio will be given free with every \$1.00 purchase of school supplies made at the Chronicle office.

The Women's Guild are serving refreshments on Fair Day. So don't forget to patronize them, and treat the children to "hot dogs."

The regular monthly meeting of the Floral Local U.F.W.A. will be held at the home of Mrs. Orval Bills on Wed., Sept. 13th at 2.30 p.m. Roll call—"Hints on home canning."

Miss Jean Collicutt who has been convalescing at her home here following a recent illness, has fully recovered and left today (Thursday) to resume her duties as nurse in training at the Holy Cross Hospital, Calgary.

Mrs. R. Annott entertained at a tea instead of a garden party on Wednesday afternoon owing to the rainy weather. The affair was on behalf of the Anglican church building fund and was a success in spite of the inclement weather.

Angus and James Gordon of Broderick, are visiting at the home of their cousin A. W. Gordon and Mrs. Gordon. They report no crops in that part of Saskatchewan.

P. C. Griffiths left on Wednesday for Calgary to attend the wedding of his brother-in-law Mr. Geo. Thompson to Miss Wilma Hopkins of the editorial department of the U.F.A. paper. Mrs. Griffiths and Dorothy were also in attendance.

The band concert given in the Crossfield Park on Sunday afternoon by the Calgary Elks Band was greatly enjoyed by a large gathering. Following the concert the band were the guests of the Crossfield Board of Trade to dinner at the Oliver Cafe.

School opening dates vary for the country schools, some have started, others start Monday, and still others on Tuesday.

Falling asleep in his father's grain field at Carvel, Mike Shaigee, aged three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

The fall meeting of the Ladies Aid of the Crossfield United Church will be held at the home of Mrs. Wm. Laut on Wednesday afternoon, Sept. 6th at 3.00 o'clock. Please keep this date in mind.

Mrs. J. M. Williams entertained at a garden party at her home on Wednesday afternoon, although rain interfered somewhat with arrangements, the afternoon was pleasantly spent in games. A very bounteous and delicious lunch was served by the hostess. Forty guests were present.

Donnie McFadyen left Chicago for Crossfield on Tuesday, he is making the trip by motor and should arrive here this week-end.

Donnie has been attending the Chicago University since the close of the hockey season. He is coming home for a well earned holiday before returning east for the hockey season.

Mr. and Mrs. J. P. Winning and son Martin of Hanna, Alta., and the Misses Margaret and Mary Winning of Kilmarnock, Scotland, were visitors in town on Friday. Mr. Winning's sisters who are leaving shortly for their home in Scotland have been greatly impressed with the vastness of the prairies and the grandeur of the rockies.

### Visit Brooks Board of Trade

In response to an invitation from the Calgary Board of Trade, Past President G. G. Huser and T. Tredaway, represented our local Board on a visit to the Brooks Board of Trade on Wednesday of this week. A special bus was engaged for the trip, leaving Calgary at 8.30 and arriving at Brooks at 12.30.

Before and after the luncheon a pleasant and interesting time was spent in visiting the irrigated produce and fruit growing districts.

Too much cannot be said for the President Major Cross and members of the Brooks Board of Trade for the hearty reception given the visitors during their short stay which will be remembered for a long time to come.

**To Build Elevator at Nier**

Mr. Heinbecker of the firm of Pariali & Heinbecker, was a visitor in town on Wednesday, and stated that his firm would build an elevator at Nier Sliding and have it finished in time to handle this year's crop.

We understand that Kenny Borbridge, well-known ball player, will be in charge of the elevator when completed.

### Thieves Make Silent Entry

Some time during Wednesday night the Highway Garage was entered and tubes, spark plugs and other accessories valued at \$35 taken.

### George and Fong Branch Out

The Star Cafe at Lacombe has been recently purchased by George and Fong of the Oliver Cafe. Fong will have charge of the Lacombe cafe, while George will continue the management of the Oliver.

If you happen to be in Lacombe remember its the Star Cafe and in Crossfield, the Oliver Cafe. You are assured of the best of service at either of these cafes.

### NOTICE

The ladies of the C.W.L. will hold a Tea and Sale of Home Cooking in the building formerly occupied by Halliday & Co. on Saturday afternoon Sept. 9th, from 3 to 6. There will be a turkey roasted at 5 cents advance during the afternoon.

The C.W.L. will hold their annual chicken supper on Thanksgiving, Oct. 9.

**A LITTLE BOOST FOR DAN**  
Mr. Dan McArthur has just completed a very successful contract of moving the Evangelical Church at Westcott to the Jackson Sliding. The building being 32x26, and over such narrow roads, was no small task, and without any mishaps to the building.

The trustees were more than pleased with the way our Madden contractor handled the work.

### Harvest Delayed

Rain on Wednesday and today Thursday, will delay harvesting in this district. East of town about 75 per cent of the grain is cut.

West of town 35 to 40 per cent of the grain has been cut. Frank Laut has combined about 100 acres of wheat and it will average around 20 bushels to the acre.

Evert Bills was all ready to start threshing for O. E. Coffin on Wednesday, and Wilson Stafford was all set to start at home when it began to rain.

### Church of the Ascension

(Anglican)  
Sunday, September 3rd.  
Evening and address by the Rev. Harding Priest, Western Secretary of the S.B.R.E.

Rev. Mr. Lytke of the Bible Society will speak in the United Church and will speak later in the year at the Anglican Church.

A. D. Currie.

### NOTICE

The Crossfield School Board will be pleased if students in the district who are desirous of taking up Grade XII work will notify the undersigned or the principal, on or before Sept. 5th.

Wm. Laut, Secretary

We made a slight error in publishing the results of the high school examinations. The students passed in 53.9 per cent of the units attempted, whereas the Chronicle said 51 per cent. We are glad to make this correction, as we had been misinformed.

### HORSE'S KICK IS FATAL TO CHILD

Kicked by a horse on his father's farm at Dog Pound, on Aug. 22, Albert Kerr McArthur, infant son of Mr. and Mrs. Edward McArthur of Dog Pound, died Wednesday morning in the General Hospital, Calgary.

He was struck on the head by the hooves of the horse and suffered a fracture of the skull. He had been confined to the hospital for the past week. As it was found that the mishap had been entirely accidental, no inquest will be held.

The boy was born in Dog Pound and was aged one year and five months. Besides his parents, he is survived by six brothers and one sister, Edward, James, William, John, Peter and Daniel, and Elizabeth, all at home.

Funeral services will take place Friday afternoon at 3 o'clock from the family residence. Interment will be made at Bottrell, with the Armstrong Funeral Home in charge.

**BORN**—To Mr. and Mrs. J. Masie, Jr., Madden, on Aug. 27, 1933, a daughter.
